What do the mass graves tell us?

There are a lot of partisan graves in Poland. You can find them in the fields, forests, and meadows. These graves remind us of the great heroism of the partisans and their love for their homeland. They testify to the cruel treatment of Poles by the Germans. Our compatriots heroically fought for Poland, and this is why they are buried in mass graves. We should honor the fallen heroes because now we live in an independent country. We should pay our respects by decorating their graves for the upcoming All Souls' Day.
